

С сердечно-сосудистым приветом!

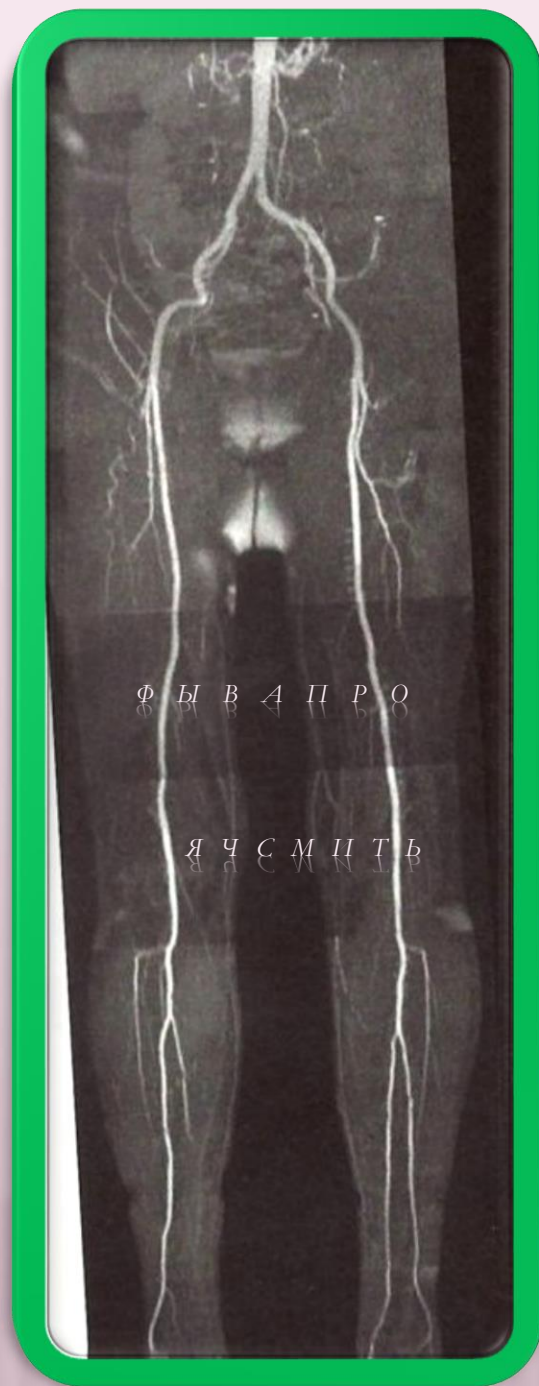

ИОСИФ РАБКИН

Причуды рентгена

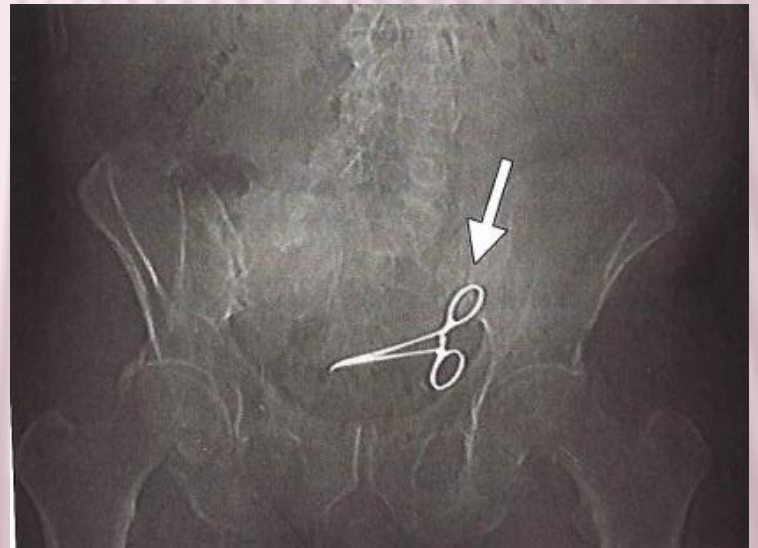

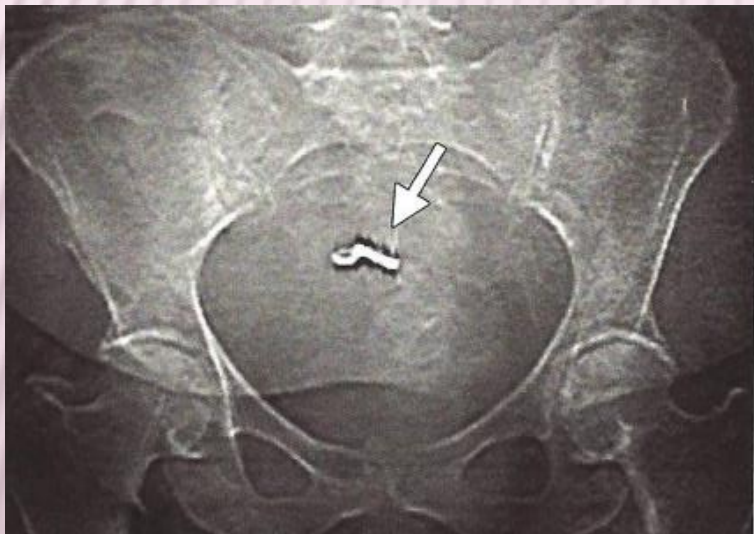

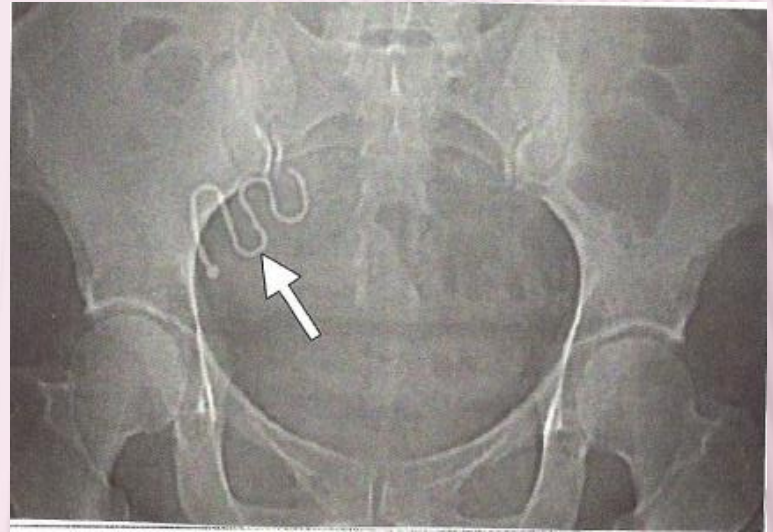

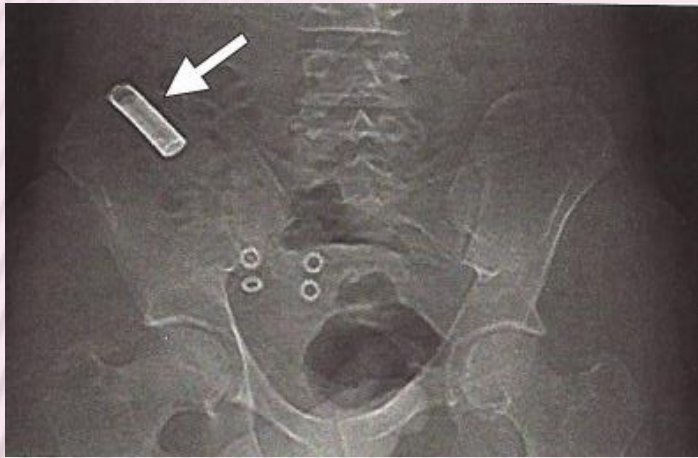

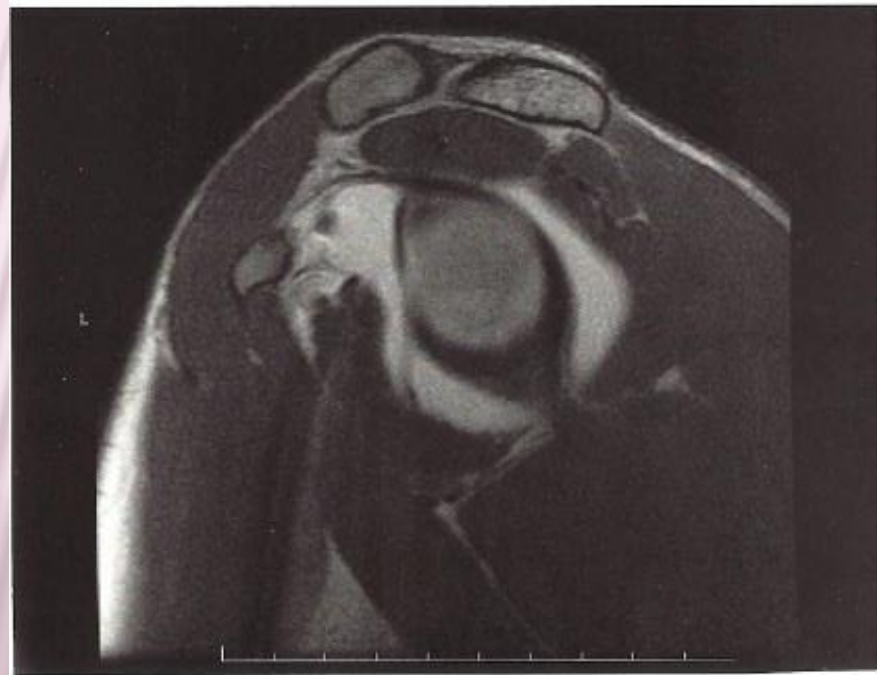

Ф Ы В А П Р О

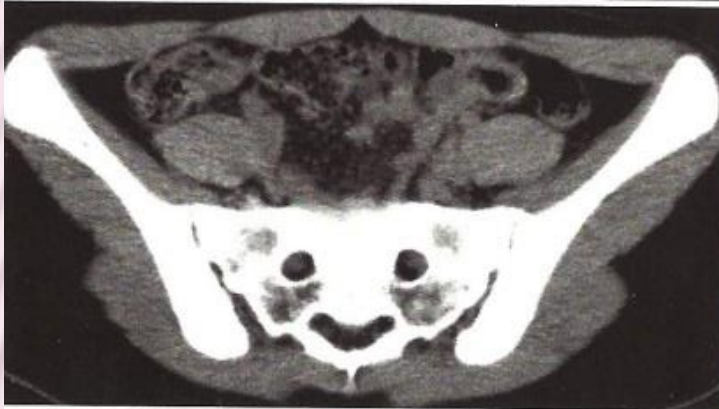

Я Ч С М И Т Ь

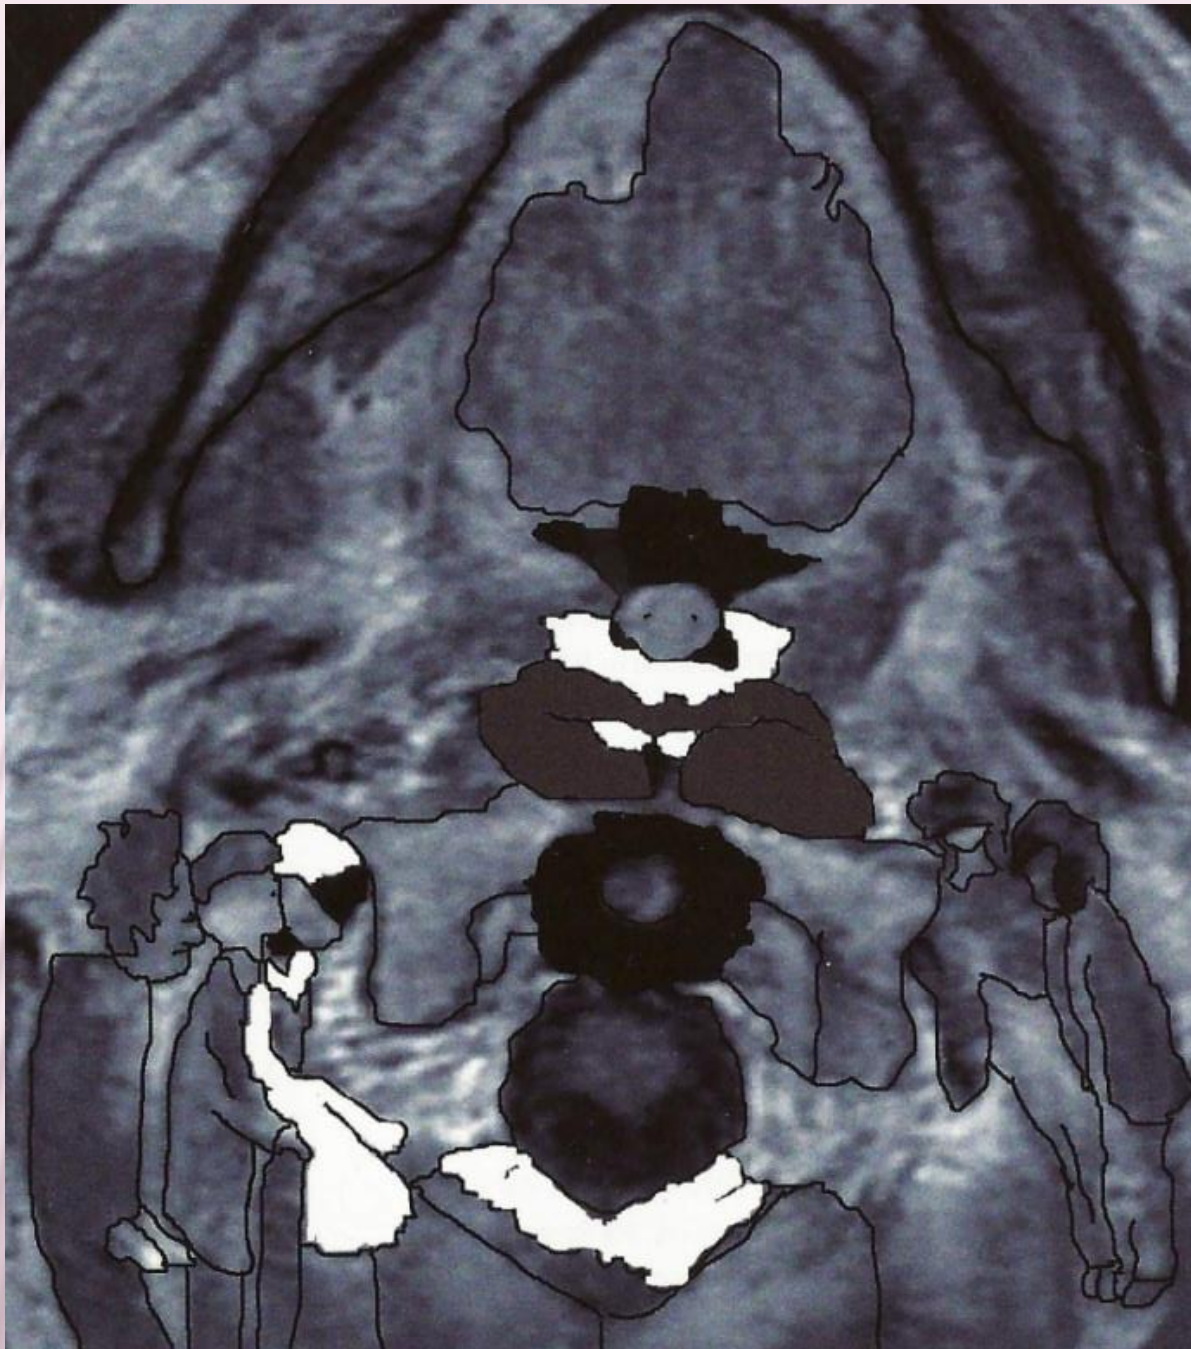

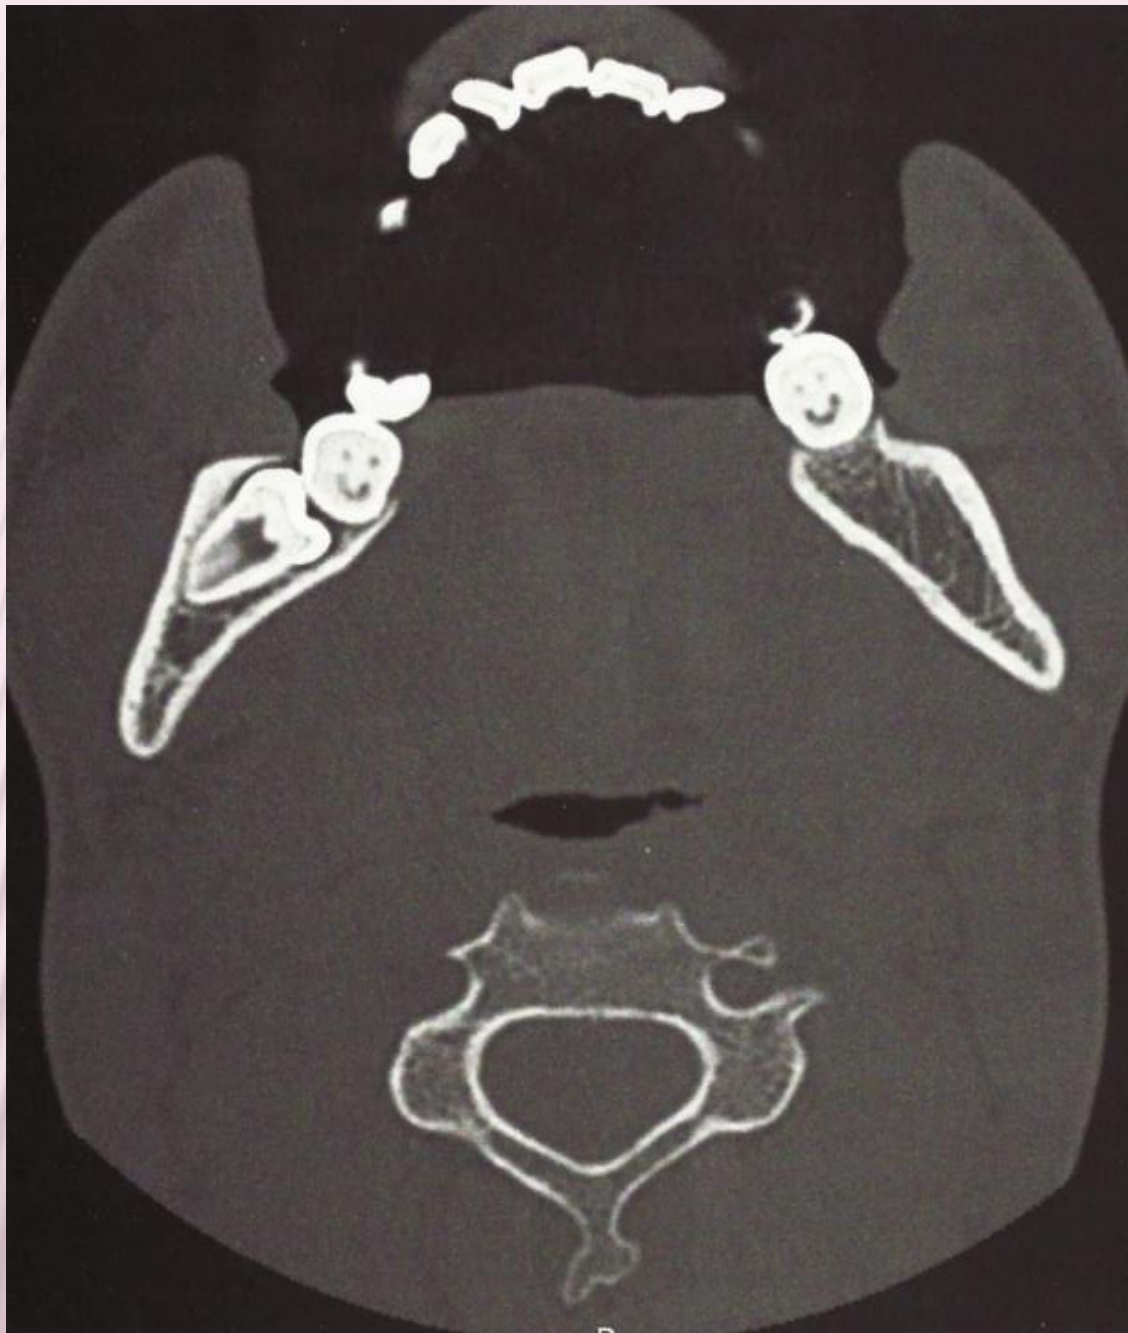

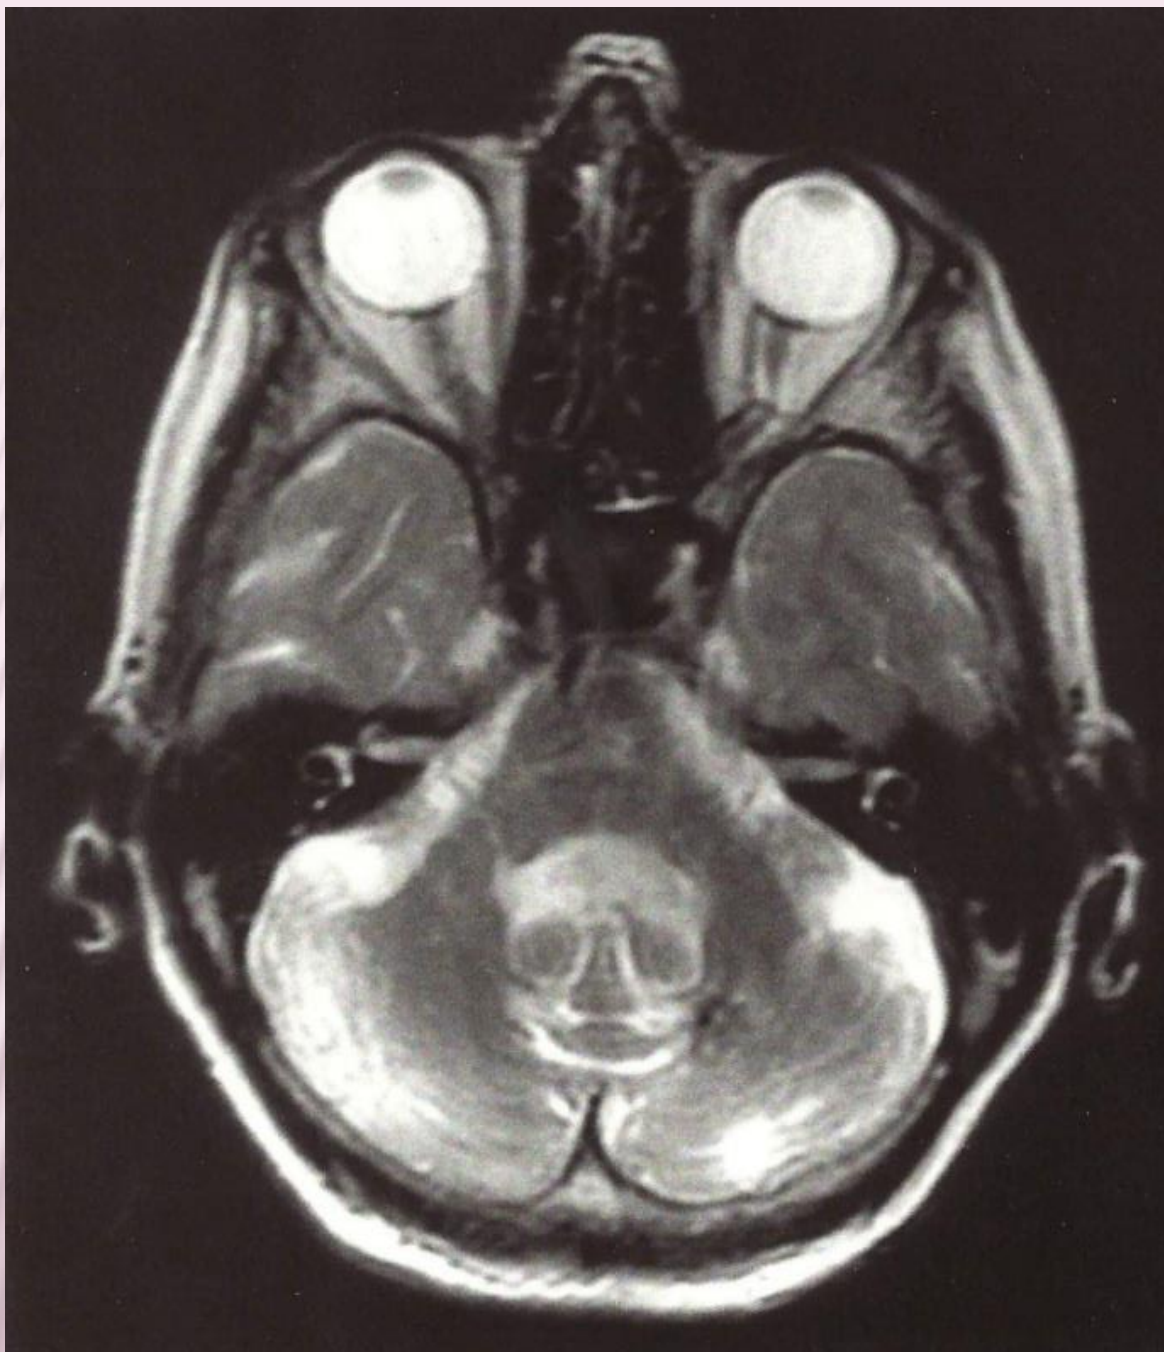

A small bowel examination performed in an 82-year-old woman revealed an unexpected nocturnal bird of prey.

Иосиф Рабкин

Доктор медицинских наук, член-корреспондент
РАН, "Человек года США" 1997 г, рентгенолог-
кардиолог. Бостон, США

Его научный пьедестал -
Рентген, магический кристалл,
На этом чудо-пьедестале
Сердца из кремния и стали,
Но с поправкой небольшой:
Они от Рабкина. С душой!

2000 г.

**Поздравляем дорогую
Маргариту Дмитриевну Рабкину
со знаменательным Юбилеем!!!**
